# Overview

Simplify is the platform to learn about complexities in a simple manner. A place to learn and teach.

The web application provides students and tutors an open ground to exchange knowledge without any hassle. The application gives any enthusiast the ability to either become a student or a tutor and share their knowledge with like minded individuals.

The focal point is that the platform is open source, i.e. open for the world to share and gain knowledge.

# Specification

## Alan, 37

### Tutor

- Tutor should be able to login or register using google authentication or a registration form.
- Tutor should be able to register as a tutor.
- Tutor should be able to see their courses and be able to add new courses.
- Tutor should be able to add a description for a new course.
- Tutor should be able to publish course materials including slides, pdfs, images and video.
- Tutor should have access to forums for providing important updates regarding the course and for clearing doubts.

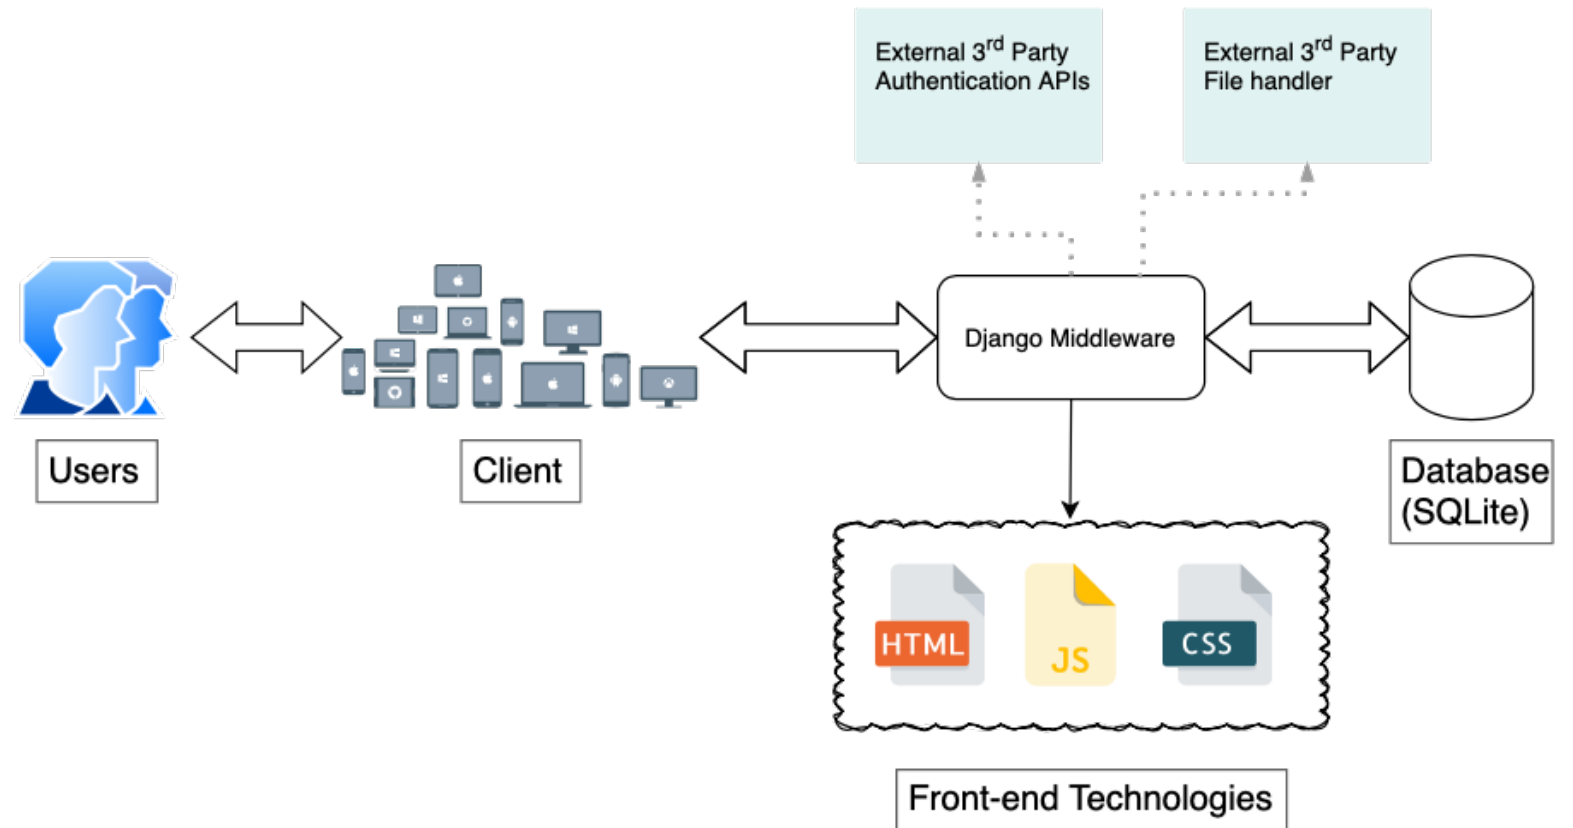

## Daniel, 21

### Student

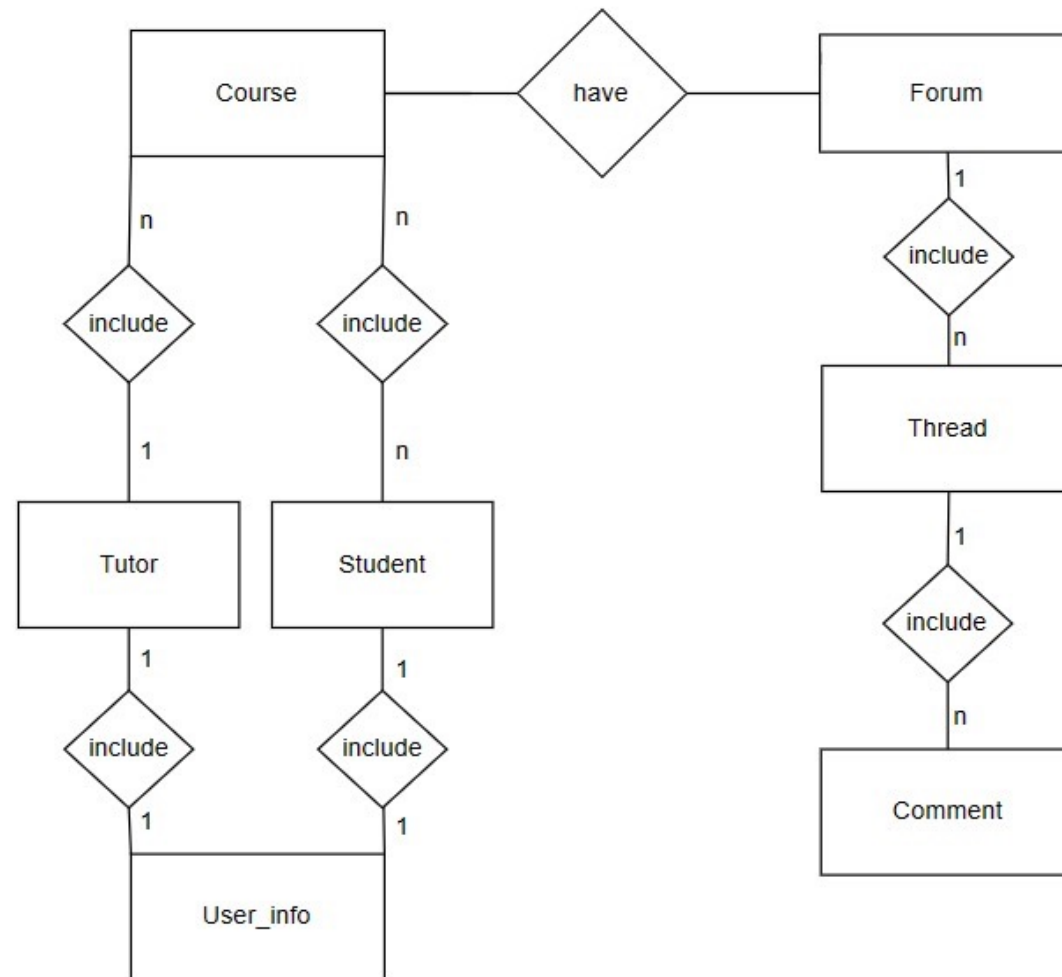

- Student should be able to login or register using google authentication or a registration form.
- Student should be able to register as a student.
- The platform should be able to distinguish between the tutor and the student, with access being given to the student user for only the student specific pages.
- Student should be able to access all the course material.
- Student should be able to submit course work provided under a given course.
- Student should be able to enrol in more than one course at a given time.
- Student should have access to forums for discussion and posting questions.

Simplify's Design Specification

# ER Diagram

# ER Diagram Description

Forum		
Field	Type	Description
<u>ForumID</u>	integer	PK,unique, Used to identify the forum
CourID*	varchar	FK, Used to connect courses and forum tables
ThreadID*	integer	FK, Used to connect thread and forum tables

Comment		
Field	Type	Description
<u>CommentID</u>	integer	PK,unique
AuthorID*	integer	FK, Used to connect comment and user_info tables
Comment	varchar	User comments inside the thread
ThreadID*	integer	FK, Used to connect comment and thread tables

Thread		
Field	Type	Description
<u>ThreadID</u>	integer	PK,unique
AuthorID*	integer	FK, Used to connect user_info and thread tables
Thr_mes	varchar	Text message inside the thread

Course		
Field	Type	Description
<u>CourID</u>	integer	PK,unique, Used to identify the course
CourName	varchar	Name of the course
Material	urfield	Various teaching materials uploaded by tutor during the course
Introduction	varchar	Brief description of the course content
ForumID*	integer	FK, Used to connect course and forum tables

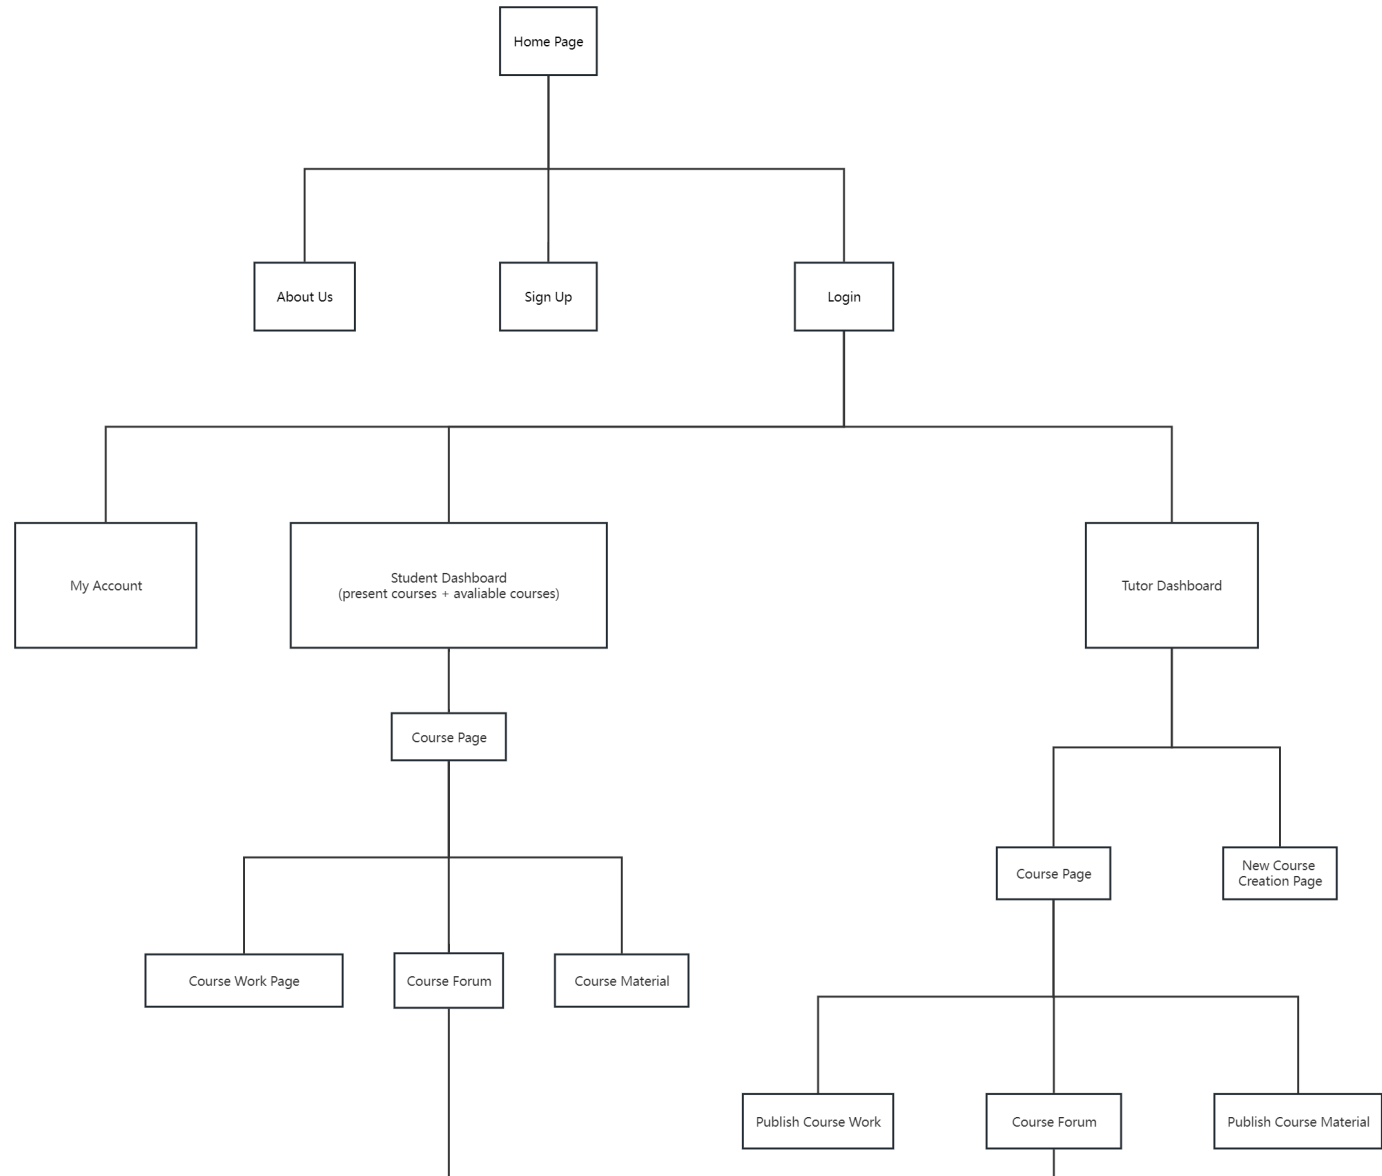

User_info		
Field	Type	Description
<u>UserID</u>	integer	PK,unique, Used to identify each student and tutor
UserName	varchar	User's username at the time of registration
Password	varchar	User's password at the time of registration
type	integer	Used to distinguish the identity of the user
FirstName	varchar	User's firstname
LastName	varchar	User's surname

Tutor		
Field	Type	Description
<u>TutorID</u>	integer	PK,unique
CourID*	integer	FK, Used to connect tutor and course tables

Student		
Field	Type	Description
<u>StuID</u>	integer	PK,unique
CourID*	varchar	FK, Used to connect student and course tables
